

Forum LABO PARIS: great success for this 17th edition!

The 2023 edition of Forum LABO PARIS has just come to an end with an extremely positive balance sheet and indicators that have increased compared to the previous edition in Paris.

With **330 exhibitors (+25%)** and **5,818 visitors (+7%)**, despite the impact of a transport strike on the first day, Forum LABO PARIS stood out for the quality of its visitors and its business climate, as evidenced by the **776 business Lab'Meetings** held (+27%) between exhibitors and key industry players.

A reaffirmation of the pivotal role that **Forum LABO** plays each year, as the **key event and federator of the Laboratory sector** dedicated to Research, Analysis, Production and Control. Forum LABO also demonstrates the attachment of the public, exhibitors and visitors, **to face-to-face events**, which are real places to meet, do

business and put products and innovations into perspective.

The 2023 programme was distinguished by its rich, multidisciplinary scientific and technical content, with **21 conferences**, including the **opening conference dedicated to CSR**, and **13 training sessions** led by exhibitors. Visitors were thus able not only to take a look at the major challenges facing the industry, but also to discover new analysis techniques and technological advances. Not forgetting the SEP 2023 conference, organised by the French-speaking Association of Separative Sciences (AFSEP), which brought together 282 specialists, 75 conferences, 4 workshops and 87 posters at the exhibition.

With innovation as a strong marker of the show, the **Innovation Trophies** and the **French Start-up Award** highlighted the products and services that will shape the laboratory of tomorrow. The 70 applications clearly show the investment effort of Forum LABO exhibitors to meet the major challenges facing our society. The fields of life sciences and more particularly health with the emergence of new therapies, the notion of sustainability and impact on the environment, digitalisation and not forgetting artificial intelligence have logically characterised this year. The jury of independent experts selected **6 winners (CHEMLYS, GENSOR, GREINER BIO ONE, METTLER TOLEDO, NEW ENGLAND BIOLABS, TRIONYX)** and one special mention (**LE LABO DURABLE**). [Discover the Winners...](#)

Innovation is always at the heart of the event, with **90 new products presented by exhibitors**, a **Lab'Start-up area** and the **Forensic Science area**, as well as patented innovations from the **National Gendarmerie's Judicial Division (PJGN)**.

Lastly, **employment and recruitment**, which are central to the sector's concerns, were able to mobilise the **EDUCATION & EMPLOYMENT AREA**, under the impetus of the Bernard Gregory Association, the prestigious schools and, for the first time, APEC, to talk about careers and opportunities in the scientific sectors. In this area, **JOB DATINGS** brought together candidates seeking employment, training or advice, and exhibitors, recruiters or partners.

Thank you to all, exhibitors, visitors, journalists, speakers, congress participants and our scientific partners for having contributed once again to the success of Forum LABO PARIS.

Forum LABO will meet you in Lyon on 27 and 28 March 2024 at the Centre des Congrès in France.
